Experience

Design Engineer
eBay (2016 - 2018)

Assisting the design teams with implementing their work into accurate HTML, CSS and JavaScript on our Angular 2 codebase and Github workflow.

Designer
Guidebook (2013 - 2015)

Lead the highly successful redesign of their guide management and creation tool (Gears). Helped build web version and mocks for new mobile features.

Product Designer
WePay (2011 - 2013)

Designed various features, flows and landing pages; being their only designer for a year. Aided engineering with troubleshooting code on design implementations.

Designer
Bebo (2011)

Lead the redesign of the whole social network for its 10 million+ active monthy users. Provided UI and marketing design work for web and mobile.

Skills

Photoshop | Illustrator | Sketch | Python

PHP | JavaScript | HTML | CSS | Web

Mobile | Responsive | SASS | Stylus

References

> Derek was a pleasure to work with. During his time at Somo Enterprises (aka Friend.ly), he was passionate, detail-oriented, and got along great with everyone else on our team.

Ed Baker
Co-Founder @ Friend.ly
2010

> Derek is a terrific designer who can design great looking websites, along with having amazing CSS/HTML to make those designs something engineers can go and implement. I enjoyed working with Derek and would recommend him as a top UI/visual designer.

Akash Garg
CTO @ Bebo
2011

> A hard worker and excellent illustrator. He made great strides as a designer since joining WePay. It was a pleasure collaborating with Derek on the projects our team was tasked with.

Dylan Wreggelsworth
Designer Coworker @ WePay
2012

> Derek is a very gifted front end developer. He has the eye of a designer, with the skillset of a developer, which is a very rare combination. He brings the designers mockups to life and often they look better once he's coded it up, than the mockup. He was a true asset to our team at eBay and will be an asset to whichever team he works with.

James Doran
UI Designer @ eBay
2018

> Derek is a designer and an artist, as well as being incredibly proficient in programming and web development. He has brought many of my designs to life, sometimes with only a screenshot and no specifications. Most of the great design on eBay's intranet is because of Derek. He is a bridge between development and design and an incredible asset to any team.

Sahand Hajizadeh
Product Designer @ eBay
2018
